Instructions for Use, Installation and Servicing

For use in GB, IE (Great Britain and Republic of Ireland)

IMPORTANT

THE OUTER CASING, FRONT AND GLASS PANEL BECOME EXTREMELY HOT DURING OPERATION AND WILL RESULT IN SERIOUS INJURY AND BURNS IF TOUCHED. IT IS THEREFORE RECOMMENDED THAT A FIREGUARD COMPLYING WITH BS 8423 (LATEST EDITION) IS USED IN THE PRESENCE OF YOUNG CHILDREN, THE ELDERLY OR INFIRM.

ENSURE THAT ALL COMBUSTIBLE MATERIALS ARE NOT POSITIONED ABOVE OR NEAR TO THE APPLIANCE OUTER CASING.

This product contains a heat resistant glass panel. This panel should be checked during Installation and at each servicing interval. If any damage is observed on the front face of the glass panel (scratches, scores, cracks or other surface defects), the glass panel must be replaced and the appliance must not be used until a replacement is installed. Under no circumstances should the appliance be used if any damage is observed, the glass panel is removed or broken.

It is essential that ALL of the screws that retain the glass frame are replaced and tightened correctly. Under no circumstances should the appliance be operated if any of these screws are loose or missing.

These Instructions must be left with the appliance for future reference and for consultation when servicing the appliance. Please make the customer aware of the correct operation of the appliance before leaving these instructions with them.

The commissioning sheet found on Page 3 of this Instruction manual must be completed by the Installer prior to leaving the premises.

Information Requirement - Gas Heaters56

If you have purchased your stove or fire from an authorised stockist within our Expert Retailer Network, then automatically your product will carry a 2 year warranty as standard. The 2 year warranty can be further extended to a total warranty period of 5 years by registering your Gazco Stove or Fireplace within one month of the latter of the purchase date or installation date. Accordingly, the start date for the warranty period is the date of purchase. During the registration process, the Expert Retailer details will be required for your Extended Warranty to be activated. Any product purchased outside of our Expert Retailer Network will carry a standard 12 month, non-extendable warranty.

It is a condition of the Extended Warranty that the installation complies with the relevant Building Regulations and is carried out by a suitably trained and qualified individual (GasSafe in the UK or equivalent in other countries) with the certificate of installation and the Commissioning Report on Page 3 completed and retained by the end user.

Full terms and conditions are detailed in the Warranty Statement on the Gazco website www.gazco.com. In the event of any conflict of information the wording on the website shall prevail.

Important Note: Should any problems be experienced with your product, claims must first be submitted to the Expert Retailer where the appliance was purchased from who will offer immediate assistance or contact Gazco on your behalf.

It is a requirement of the Building Regulations 2010 that the installation of this appliance is notified to the Local Authority. It is the responsibility of the GasSafe registered installer to carry out this notification to the Local Authority via the GasSafe register Competent Persons Scheme in England and Wales (different rules apply in Scotland and Northern Ireland).

When the installation has been notified, GasSafe will send a Building Regulations Compliance Certificate to you containing details of the work completed. Please ensure that the person responsible for the installation of this appliance completes this notification and records it in the Appliance Commissioning Checklist on page 3.

IT IS YOUR RESPONSIBILITY TO COMPLY WITH THE BUILDING REGULATIONS AND BE ABLE TO PRODUCE THIS CERTIFICATE SHOULD IT BE REQUIRED IN THE FUTURE.

Appliance Commissioning Checklist

To assist us in any guarantee claim please complete the following information:-

IMPORTANT NOTICE

Explain the operation of the appliance to the end user, hand the completed instructions to them for safe keeping, as the information will be required when making any guaranteed claims.

User Instructions

Welcome

Congratulations on purchasing your Gazco Vogue, if installed correctly Gazco hope it will give you many years of warmth and pleasure for which it was designed.

The purpose of this manual is to familiarise you with your appliance, and give guidelines for its installation, operation and maintenance. If, after reading, you need further information, please do not hesitate to contact your Gazco retailer.

WARNING

In the event of a gas escape or if you can smell gas, please take the following steps:

- Immediately turn off the gas supply at the meter/emergency control valve
- Extinguish all sources of ignition
- Do not smoke
- Do not operate any electrical light or power switches (On or Off)
- Ventilate the building(s) by opening doors and windows
- Ensure access to the premises can be made

Please report the incident immediately to the National Gas Emergency Service Call Centre on 0800 111 999 (England, Scotland and Wales) , 0800 002 001 (N. Ireland) or in the case of LPG, the gas supplier whose details can be found on the bulk storage vessel or cylinder.

The gas supply must not be used until remedial action has been taken to correct the defect and the installation has been recommissioned by a competent person.

1. General

- 1.1 Installation and servicing must only be carried out by a competent person whose name appears on the GasSafe register. To ensure the engineer is registered with GasSafe they should possess an ID Card carrying the following logo:

- 1.2 In all correspondence, please quote the appliance type and serial number which can be found on the data badge located at the rear of the appliance or on the Commissioning Checklist on Page 3.
- 1.3 **Do not** place curtains above the appliance: You must have 300mm clearance between the appliance and any curtains at either side.
- 1.4 The manufacturer considers the full outer casing of this stove to be a working surface and it will become hot whilst in operation. A suitable guard is recommended to protect young children, the aged and the infirm.
- 1.5 No furnishings or other objects should be placed within 1 metre of the front of the appliance.
- 1.6 If a shelf is fitted, a distance of 225mm above the appliance is required.
- 1.7 Do not attempt to burn rubbish in this appliance.
- 1.8 This appliance must only be operated with the door secured firmly in position. If any cracks appear in the glass the appliance must not be used until the glass panel is replaced.
- 1.9 If, for any reason, the flue has to be removed from the appliance, the seals must be replaced in the inner spigot.
- 1.10 Do not obstruct the flue terminal in any way i.e. by planting flowers, trees shrubs etc. in the near vicinity, or by leaning objects up against the terminal guard.
- 1.11 Do not put any objects on the terminal guard; it will lose its shape.
- 1.12 Do not use a garden sprinkler or hose near the terminal.
- 1.13 This product is guaranteed for 5 years from the date of installation, as set out in the terms and conditions of sale between Gazco and your local Gazco retailer. Please consult with your local Gazco retailer if you have any questions. In all correspondence always quote the Model Number and Serial Number.

User Instructions

2. Operating the Appliance

The method used to access the control valve differs between models.

Vogue Midi Models

The control valve is located behind the plinth.

- 2.1 Remove the plinth to access the controls by lifting the hooks clear of the slots on the front of the appliance, see Diagram 1.

Vogue Midi Midline & Highline Models

The control valve is located behind the lower door.

- 2.2 Pull the lower door open from the right hand side to access the controls, see Diagram 2.

All Models

The valve has two controls, see Diagram 3:

1. The right-hand knob controls the pilot ignition.
2. The left-hand knob controls the main burner.

- 2.3 Refer to separate instructions if your appliance is upgraded to include battery remote control. The instructions below apply whether or not you have the remote upgrade.

Lighting the Pilot

- 2.4 To start the left-hand and right-hand control knobs must both point to off (●):

- 2.5 Press in the right-hand control knob and rotate anti-clockwise until a click is heard. Continue to press in. The knob points to the pilot (←).

The pilot is lit.

- 2.6 Keep the knob depressed for 10 seconds before releasing. The pilot remains lit.

Repeat the above steps if the pilot does not stay lit.

NOTE: If the pilot goes out, the Interlock system prevents you lighting again for a short period.

- 2.7 If, after repeating the above steps the pilot does not light, contact your Retailer or Installer.

- 2.8 Turn the right-hand knob to the left to main burner setting (↶).

Adjusting the Flame height

- 2.9 You can now adjust the flame height and temperature using the left-hand control knob.

- 2.10 Turn the left-hand knob anti-clockwise to increase the flame height.

- 2.11 Turn clockwise to decrease the height.

IMPORTANT: YELLOW FLAMES TYPICALLY APPEAR WHEN THE APPLIANCE HAS REACHED NORMAL OPERATING TEMPERATURE. THIS CAN TAKE UP TO 30 MINUTES.

WARNING: IF THE APPLIANCE FAILS TO LIGHT OR BECOMES EXTINGUISHED IN USE, WAIT 3 MINUTES BEFORE ATTEMPTING TO RELIGHT.

User Instructions

3. Turning OFF the Appliance

- 3.1 To turn the main burner off turn the left-hand knob until it points to off (●). Just the pilot remains lit.
- 3.2 Press in and turn the right-hand knob until it points to off (●). The pilot goes out.

4. Upgrading the Appliance

- 4.1 The appliance is fitted with a control valve that can easily be upgraded to battery powered remote control. There are two versions of this control which can be obtained through your local Gazco retailer. There is no requirement for this upgrade to be carried out by an approved GasSafe engineer. However Gazco recommend that this task is undertaken by a suitably competent person.
- 4.2 This upgrade can be fitted before or after installation but if side clearances are limited then it will be easier to upgrade the appliance before installation. Full instructions are included with the kit.

Standard Remote Control (PART NUMBER 8455)

- 4.3 This remote control can control the gas appliance after the pilot has been lit. It can turn the main burner on and regulate it from low through to high and back again. It can turn the main burner off leaving the pilot burning.

Thermostatic and Timer Remote Control (PART NUMBER 8456)

- 4.4 This remote control can control the gas appliance after the pilot has been lit.

MANUAL MODE

Can be used to turn the main burner on and manually regulate it from low through to high and back again. It can also be used to turn the main burner off leaving the pilot burning.

AUTO MODE

Will automatically regulate the room to a pre-set temperature.

TIMER MODE

Will turn the appliance on and off according to a pre-set programme and automatically regulate the room temperature during the two on periods.

5. Cleaning the Appliance

IMPORTANT: THE OUTER PANNELLING OF THE GAZCO VOGUE IS MADE FROM CAST IRON. USE CAUTION WHEN INSTALLING, REMOVING AND STORING AS THE COMPONENTS ARE HEAVY AND SHOULD BE HANDLED CAREFULLY.

- 5.1 Make sure the fire and surrounds are cool before cleaning.

Use:

- A dry cloth to clean the appliance casting.
- A damp cloth for the glass front.

Vogue Midi Models

- 5.2 Remove the plinth to access the controls by lifting the hooks clear of the slots on the front of the appliance, see Diagram 4.

Vogue Midi Midline & Highline Models

- 5.3 Pull the lower door open from the right hand side to access the controls, see Diagram 5.

User Instructions

All Models

- 5.4 Remove the frame to gain access to the viewing aperture by lifting the hooks clear of the slots on the front of the appliance, see Diagram 6.

- 5.5 Using a screwdriver remove the 4 screws securing the window panel to the appliance, see Diagrams 7 & 8. Take care to support the glass when removing the screws.

Vogue Midi & Midline

Vogue Midi, Midline & Highline T

- 5.6 The frame can be removed by lifting the hooks clear of the slots from the bottom of the frame and lifting away from the appliance, see Diagram 9.

- 5.7 The glass frame must be refitted to the appliance following cleaning or servicing. Hold in position and secure with the screws.
- 5.8 Replace ALL of the securing screws ensuring that a screw is present in all fixing slots.

UNDER NO CIRCUMSTANCES SHOULD THE APPLIANCE BE USED IF ANY OF THE GLASS FRAME RETAINING SCREWS ARE LOOSE OR MISSING.

6. Arrangement of Fuel Bed

Advice on handling and disposal of fire ceramics

The fuel effect in this appliance are made from Refractory Ceramic Fibre (RCF), a material which is commonly used for this application.

Protective clothing is not required when handling these articles, but we recommend you follow normal hygiene rules of not smoking, eating or drinking in the work area and always wash your hands before eating or drinking.

To ensure that the release of RCF fibres are kept to a minimum, during installation and servicing a HEPA filtered vacuum is recommended to remove any dust accumulated in and around the appliance before and after working on it. When servicing the appliance it is recommended that the replaced items are not broken up, but are sealed within heavy duty polythene bags and labelled as RCF waste.

RCF waste is classed as stable, non-reactive hazardous waste and may be disposed of at a licensed landfill site.

Excessive exposure to these materials may cause temporary irritation to eyes, skin and respiratory tract; wash hands thoroughly after handling the material.

User Instructions

7. Log Layout

LOGS MUST BE POSITIONED ACCORDING TO THE FOLLOWING INSTRUCTIONS TO GIVE THE CORRECT FLAME EFFECT.

All logs can be identified by a letter (A - D) on their underside. Logs A and B have holes to locate each onto a burner stud.

- 7.1 Ensure the burner tray is clean and free from any debris, see Diagram 10.

- 7.2 Place Log A in position on the 2 locating pins, see Diagram 11.

- 7.3 Spread the Lava Rock evenly over the fuel bed and around Log A, see Diagram 12.

- 7.4 Position the 2 embers on the lip at the front of the fuel bed, see Diagram 13.

- 7.5 Log B is positioned on the right hand locating pin, and rests against the back liner, see Diagram 14.

- 7.6 Log C rests on Log A and the front tray with the locating pin facing up, see Diagram 15.

User Instructions

- 7.7 Log D fits onto the locating pin and rests on Log B, see Diagram 16.

- 7.8 Spread a liberal amount of the Embaglow fibres provided on the sections highlighted, see Diagram 17.

8. Flame Failure Device

- 8.1 This is a safety feature incorporated on this appliance which automatically switches off the gas supply if the pilot goes out and fails to heat the thermocouple.

IF THIS OCCURS DO NOT ATTEMPT TO RELIGHT THE APPLIANCE FOR 3 MINUTES.

9. Running In

- 9.1 During initial use of a new Gazco appliance a strong odour will be encountered as various surface coatings become hot for the first time. Although these odours are harmless it is recommended that the appliance is operated on maximum for 4 to 8 hours in order to fully burn off these coatings. After this period the odours should then disappear.

If the odours persists, please contact your installer for advice.

- 9.2 During the first few hours of burning there may be discolouration of the flames. This will also disappear after a short period of use.

10. Servicing

- 10.1 The appliance must be serviced every 12 months by a qualified GasSafe Engineer. In all correspondence always quote the Model number and the Serial number which may be found on the Commissioning Checklist (Page 3).

11. Ventilation

- 11.1 This appliance requires no additional ventilation.

12. Installation Details

- 12.1 Your installer should have completed the commissioning sheet at the front of this book. This records the essential installation details of the appliance. In all correspondence always quote the Model number and Serial number.

13. Hot Surfaces

- 13.1 Parts of this appliance become hot during normal use. Regard all parts of the appliance as a 'working surface', except for the access to the controls.
- 13.2 Provide a suitable fire guard to protect young children and the infirm.

Installation Instructions

Site Requirements

1. Flue and Chimney Requirements

Note: This appliance must only be installed with the flue supplied.

You must adhere to the following:

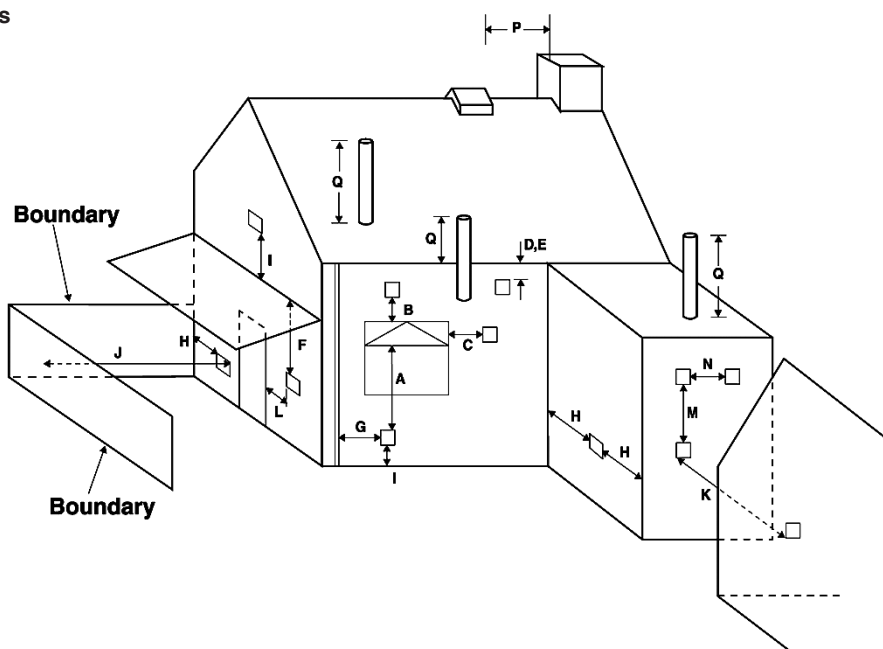

- 1.1 The flue must be sited in accordance with BS5440: Part 1 (latest edition), see Diagram 1.
- 1.2 Fit a guard to protect people from any terminal less than 2 metres above any access such as level ground, a balcony or above a flat roof.
- 1.3 All horizontal flues must be securely fixed and fire precautions followed in accordance with local and national codes of practice.
- 1.4 A restrictor may be required. Refer to Technical Specifications on page 14.

2. Timber Framed Buildings

- 2.1 To prevent a fire hazard, you must provide additional clearance when the appliance passes through a wall containing any combustible materials.
- 2.2 A steel sleeve must be inserted into the hole through which the flue passes to give an air gap of 25mm between the sleeve and any outside surface of the flue.
- 2.3 Contact your local buildings authority for further guidance on installing gas fires in timber framed buildings.

Note: Make sure you provide adequate clearance at the sides and back of the appliance for servicing access.

1 UK Dimensions

Dimension	Terminal Position	Minimum Distance
A*	Directly below an opening	600mm
B*	Above an opening	300mm
C*	Horizontally next to an opening	400mm
D	Below gutters, soil pipes or drain pipe	300mm
E	Below eaves	300mm
F	Below balcony or car port roof	600mm
G	From a vertical drain pipe or soil pipe	300mm
H	From an internal or external corner or to a boundary alongside the terminal	600mm
I	Above ground, roof or balcony level	300mm

Dimension	Terminal Position	Minimum Distance
J	From a surface or boundary facing the terminal	600mm
K	From a terminal facing the terminal	600mm
L	From an opening in the car port (e.g. door, window) into the dwelling	1200mm
M	Vertically from a terminal on the same wall	1200mm
N	Horizontally from a terminal on the same wall	300mm
P	From a structure on the roof	600mm
Q	Above the highest point of intersection with the roof	300mm

* In addition, the terminal should not be nearer than 300mm to an opening in the building fabric formed for the purpose of accommodating a built-in element such as a window frame.

Installation Instructions

Site Requirements

3. Rear Flue

- 3.1 This flue extends horizontally from the back of the appliance, see Diagram 2.

ALL MODELS (8526)

Terminal dimensions:

395 x 200 x 200 mm (H x W x D)

Guard supplied

Cut to length as required on site, see Diagram 2.

There are two types of flue terminal: horizontal (Section 3b) and vertical (Section 3d).

3a. Top Flue Up and Out Kit

- 3.2 This flue rises vertically from the top of the appliance, then continues horizontally outward, see Diagrams 3A & 3B. The basic kit comprises:

ALL MODELS (8523/8523AN)

- 1 x 500mm vertical length
- 1 x 500mm terminal length
- 1 x 90 degree elbow
- 1 x wall plate
- 1 x 52mm restrictor
- 1 x 60mm restrictor
- 1 x 75mm restrictor
- 4 x fixing screw

3B

Vogue Midi T/ Midline/ Highline

- 3.3 This kit provides the minimum materials. Extra lengths can be added to the vertical and horizontal sections; refer to Section 4.
- 3.4 Refer to Installation Instructions, Technical Specification on page 14 to identify when to use a restrictor.

3b. For horizontal terminal installations:

- 3.5 Decide on the terminal position.
- 3.6 Measure the height from the top of the appliance to the centre of the required hole. For minimum and maximum dimensions see Diagram 3 & 4.
- 3.7 To fit the flue you must have access to the top or the side of the appliance to connect the flue.
- 3.8 Assemble the vertical sections making sure the top plate and flue collar are fitted before the flue pipe.
- 3.9 Add the 90° elbow.
- 3.10 Add the horizontal section and terminal. **Only the horizontal terminal can be reduced in size.**
- 3.11 A masonry installation requires the addition of a suitable lintel to support the opening. Refer to Installation Instructions, Technical Information for details of the flue length.

Installation Instructions

Site Requirements

3c. Top Flue Up and Out with Additional Bend

- 3.12 An additional bend can be used on the horizontal section (45° or 90°) but the overall horizontal flue is reduced, see Diagram 4.

3d. Top Flue Vertical Kit

- 3.13 This flue is vertical from the top of the appliance, see Diagram 5. A minimum vertical rise of 3m (9'10") to a maximum of 10m (32'10").

999-539/999-539AN - Vogue Midi/ Midline Models

The basic kit comprises:

- 2 x 1m lengths
- 1 x 1m terminal lengths
- 1 x 52mm restrictor (sliding plate assembly)
- 1 x 47mm restrictor (sliding plate assembly)

8524/8524AN - Vogue Midi/ Midline/ Highline T Models

The basic kit comprises:

- 2 x 1m lengths
- 1 x 1m terminal length
- 1 x 52mm restrictor
- 1 x 47mm restrictor - Not used on this appliance
- 1 x 60mm restrictor
- 1 x 70mm restrictor - Not used on this appliance

All Models

- 3.14 Extra lengths can be added, see Diagram 5.
3.15 Refer to Installation Instructions, Technical Specification to identify when to use a restrictor.

3e. Top Flue Vertical Offset Kit (8530/8530AN)

- 3.16 Used with kit 999-539. A minimum rise of 500mm (19½") is required to the first bend, see Diagram 5.

Installation Instructions

Site Requirements

4. Optional Extra Flue Lengths and Bends

Nominal Length	Actual Length	Stainless Finish	Anthracite Finish
200mm	140mm	8527	8527AN
500mm	440mm	8528	8528AN
1000mm	940mm	8529	8529AN
45° Bend	N/A	8507	8507AN
90° Bend	N/A	8508	8508AN
Optional Flue Collar		8548MB	

5. Gas Supply

This appliance is intended for use on a gas installation with a governed meter.

- 5.1 Before installation, ensure that the local distribution conditions (identification of the type of gas and pressure) and the adjustment of the appliance are compatible.
- 5.2 Ensure the gas supply delivers the required amount of gas and is in accordance with the rules in force.
- 5.3 You can use soft copper tubing on the installation and soft soldered joints outside the appliance and below the fire.
- 5.4 A factory fitted isolation device is part of the inlet connection; no further isolation device is required.
- 5.5 All supply gas pipes must be purged of any debris that may have entered prior to connection to the appliance.
- 5.6 The gas supply enters underneath the rear of the outer box:
- 5.7 The gas supply must be installed in a way that does not restrict the removal of the appliance for servicing and inspection.

6. Ventilation

- 6.1 This appliance requires no additional ventilation.

7. Appliance Location

- 7.1 This appliance has been designed to stand on either a hearth or an optional bench:

Code	Bench	Width
RVACLB100B	Riva Bench Low	1000mm
RVACB100B	Riva Bench	1000mm
RVACLB120B	Riva Bench Low	1200mm
RVACB120B	Riva Bench	1200mm
RVACLB140B	Riva Bench Low	1400mm
RVACB140B	Riva Bench	1400mm

7.2 To Install the Bench:

Follow Section 1 Installation - All Models in Installation guide PM205 supplied with the bench kit.

7.3 To secure the appliance to the bench:

You must consider where you place the appliance on the bench before drilling the bench, see Diagram 6.

Once the position of the appliance has been decided: Follow the instructions for securing the appliance on Page 21.

- 7.4 The non-combustible hearth must be at least 12mm thick, and project a minimum of 50mm from the base of the appliance in all directions.
- 7.5 The appliance is not suitable for installation against a combustible wall. A combustible side wall must be a minimum of 150mm (Vogue Midi / Midi Midline) or 200mm (Vogue Midi T / Midline T/ Highline T 3 Sided) from the appliance. **This does not apply to wall mounted models.**
- 7.6 This appliance can be installed with an up and out flue (vertical wall - horizontal flue) or with a vertical flue with roof termination (see **Flue Options, Section 2 Site Requirements**).

HEARTH INSTALLATION (NOT APPLICABLE FOR MIDLINE, HIGHLINE & WALL MOUNTED MODELS)

- 7.7 Building Regulations state this appliance must stand on a non-combustible hearth that is at least 12mm thick and projects 50mm minimum from the base of the appliance in all directions, however Gazco recommend the hearth extends to the following dimensions, see Diagram 7.

Dimensions	A	B	C
All Models	716mm	498mm	12mm

Installation Instructions

Site Requirements

NOTE: It is not recommended to install Midline/ Highline models on a bench.

MIDLINE & HIGHLINE MODELS

- 7.8 It is not necessary to site these products on a non-combustible floor. However, for practical reasons, the floor should be flat and solid to allow the appliance to be levelled and secured in place.
- 7.9 This appliance may be situated anywhere in the room, but due consideration should be taken to ensure that it is sited within the constraints of the allowable flue configuration.

DO NOT INSTALL APPLIANCE ON A CARPET.

SECURING THE APPLIANCE TO THE WALL (WALL MOUNTED MODELS ONLY)

WARNING: This appliance weighs 62kg. The manufacturer has designed this appliance to attach to a masonry wall and all fixings supplied reflect this. If siting on a studwork wall, the fixing points must be through the timber stud and not plasterboard. Use appropriate fixings. **DO NOT** attach solely to a plasterboard wall.

- 7.10 If installing on a studwork wall it is essential that the battens are located in the fixing area for the wall mounting bracket, see Diagram 8.

7.11 DISTANCE FROM FLOOR / HEARTH LEVEL

It is necessary to leave a minimum gap of 100mm below the base of the wall mounted appliance to ensure servicing access.

MINIMUM CLEARANCE

- 7.12 **Freestanding appliances** are not suitable for installation against a combustible wall. All combustible materials must be removed from behind the appliance.
(NOT APPLICABLE FOR WALL MOUNTED MODELS.)
- 7.13 **Ensure that all minimum clearances to combustible materials are complied with, see Diagrams 9 & 10.**

The specified clearances provide the minimum distance to combustible materials. If the appliance is intended to be installed into a non-combustible opening the clearance to the **sides and above** the appliance can be reduced. However, it is recommended that the specified clearances are maintained irrespective of the materials used in the construction of the opening to allow adequate air flow and access to controls. **The clearance at the rear of the appliance must always be a minimum of 50mm (NOT APPLICABLE FOR WALL MOUNTED MODELS).**

Dimension	Vogue Midi/ Vogue Midi Midline	Vogue Midi T 3 Sided/ Vogue Midi T Midline/ Highline 3 Sided	Vogue Midi T 3 Sided Wall Mounted
A	150	200	200
B	225	225	400
C	150	200	200
D	50	50	0

Installation Instructions

1. Safety Precautions

- 1.1 For your own and other's safety, you must install this appliance according to local and national codes of practice. Failure to install the appliance correctly could lead to prosecution. **Read these instructions before installing and using this appliance.**
- 1.2 These instructions must be left intact with the user.
- 1.3 Do not attempt to burn rubbish on this appliance.
- 1.4 Keep all plastic bags away from young children.
- 1.5 Do not place any object on or near to the appliance and allow adequate clearance above the appliance.

IF THE APPLIANCE IS EXTINGUISHED OR GOES OUT IN USE, WAIT 3 MINUTES BEFORE ATTEMPTING TO RELIGHT THE APPLIANCE.

i IMPORTANT: REFER TO DATA BADGE AND TECHNICAL SPECIFICATION AT THE FRONT OF THE MANUAL TO ENSURE THE APPLIANCE IS CORRECTLY ADJUSTED FOR THE GAS TYPE AND CATEGORY APPLICABLE IN THE COUNTRY OF USE.

FOR DETAILS OF CHANGING BETWEEN GAS TYPES REFER TO SERVICING, SECTION 15, REPLACING PARTS.

Unpacking

- 1.6 Remove the appliance from its packaging, and check that it is complete and undamaged.
- 1.7 The cast plate is stored on top of the appliance. Remove and store in a safe place.

Put the loose ceramic parts to one side so that they are not damaged during installation.

2. Upgrading the Appliance

- 2.1 The appliance is fitted with a control valve that can easily be upgraded to battery powered remote control. There are two versions of this control which can be obtained through your local Gazco stockist. There is no requirement for this upgrade to be carried out by an approved Gas engineer. However Gazco recommend that this task is undertaken by a suitably competent person.
- 2.2 This upgrade can be fitted before or after installation but if side clearances are limited then it will be easier to upgrade the appliance before installation. Full instructions are included with the kit.

Standard Remote Control (PART NUMBER 8455)

- 2.3 This remote control can control the gas appliance after the pilot has been lit. It can turn the main burner on and regulate it from low through to high and back again. It can turn the main burner off leaving the pilot burning.

Thermostatic and Timer Remote Control (PART NUMBER 8456)

- 2.4 This remote control can control the gas appliance after the pilot has been lit.

MANUAL MODE

Can be used to turn the main burner on and manually regulate it from low through to high and back again. It can also be used to turn the main burner off leaving the pilot burning.

AUTO MODE

Will automatically regulate the room to a pre-set temperature.

TIMER MODE

Will turn the appliance on and off according to a pre-set programme and automatically regulate the room temperature during the two on periods.

3. Installation of the Appliance

IMPORTANT: THE OUTER PANNELLING OF THE VOGUE MIDI IS MADE FROM CAST IRON. USE CAUTION WHEN INSTALLING, REMOVING AND STORING AS THE COMPONENTS ARE HEAVY AND SHOULD BE HANDLED CAREFULLY.

Vogue Midi Models

- 3.1 Remove the plinth to access the controls by lifting the hooks clear of the slots on the front of the appliance, see Diagram 1.

Installation Instructions

Vogue Midi Midline & Highline Models

- 3.2 Pull the lower door open from the right hand side to access the controls, see Diagram 2.

All Models

- 3.3 Remove the frame to gain complete access to the control valve and the viewing aperture by lifting the hooks clear of the slots on the front of the appliance, see Diagram 3.

Securing the Appliance to the Hearth

Vogue Midi & Vogue Midi T 3 Sided

The appliance sits on a mounting bracket to secure it in place to either the hearth or bench.

- 3.4 Position the appliance:
Loosely attach the bracket to the appliance and place centrally on the hearth OR in the desired position on the bench. Remove the appliance leaving the bracket in the correct position and mark the holes to drill the bracket screws, see Diagram 4.

- 3.5 Remove the bracket and drill the guide holes.
3.6 Fix the bracket either to the hearth or the bench, see Diagram 4.

NOTE: Use the wood screws and rawl plugs in the fixing kit supplied for hearth mounting installations and the coach bolts supplied with the bench for installation onto a bench.

- 3.7 Lift the appliance so as to locate the key slots in the carcass onto the fixing screws. There are two large holes the lower flanges on the front edges of the base, see Diagram 5.

- 3.8 Place the 2 large washers over the studs and fix with 2 wingnuts, see Diagram 5.

Installation Instructions

Vogue Midi T Highline 3 Sided

The appliance has four slot in the base plate to secure in place with the screws provided.

- 3.9 Position the appliance and mark the holes to drill for the screws, see Diagram 6.

- 3.10 Remove the appliance and drill the guide holes.
3.11 Insert the rawl plugs into the guide holes.
3.12 Reposition the appliance and use the wood screws in the fixing kit supplied for hearth mounting installations to secure in place.

Securing the Appliance to the Wall

Vogue Midi T 3 Sided Wall Mounted only

- 3.13 To install the Vogue as a wall mounted product it will be necessary to remove the rear vanity panel.
3.14 Remove the 4 screws, see Diagram 7, Arrow A.
3.15 Loosen the 4 screws, see Diagram 7, Arrow B.

- 3.16 Lift the vanity panel off the top brackets, see Diagram 8.

- 3.17 Tighten the 4 loose screws (Diagram 7, Arrow B) and replace the top 2 screws (Diagram 7, Arrow A).

WARNING: This appliance weighs 62kg.
The manufacturer has designed this appliance to attach to a masonry wall and all fixings supplied reflect this. If siting on a studwork wall, the fixing points must be through the timber stud and not plasterboard. Use appropriate fixings. DO NOT attach solely to a plasterboard wall.

The fixings supplied for the Wall Mounted Kit are R-RBL Rawlbolts and should be fitted in the method described below.

Ensure a minimum substrate thickness of 100mm.

1. Drill a hole - Width: 14mm x Depth: 65mm.
Note: When fixing into brickwork, mortar joints should be avoided
Remove debris and thoroughly clean hole with brush and pump
2. Remove pre-assembled bolt and washer. Insert shield into hole and tap home with hammer until flush with surface
3. Insert bolt with washer through fixture into the shield
Tighten to 15Nm torque.

Installation Instructions

- 3.18 If installing on a studwork wall it is essential that the battens are located in the fixing area for the wall mounting bracket, see Diagram 9.

- 3.19 Position the wall mounting bracket in the required location.
3.20 Mark and drill the top left hand fixing hole.
3.21 Secure with a screw, see Diagram 10, arrow A. Do not tighten at this point.

- 3.22 Level the wall mounting bracket and mark the remaining 3 holes, see Diagram 10, arrow B.
3.23 Remove the wall mounting bracket and drill the fixing holes.
3.24 **Rear Exit only:** Cut a hole for the flue exit (see Section 6a. Flue Assembly for details).
3.25 Replace the wall mounting bracket and secure with the screws. Do not tighten at this point.
3.26 Level the wall mounting bracket, adjusting if necessary. Tighten the 4 screws.

WARNING: This appliance is heavy and should be handled with care. Two people must be used to lift this appliance.

- 3.27 Hook the top of the bracket under the top of the carcass at an angle and lower gently into position. Ensure that the bracket is fully engaged, see Diagrams 11 & 12.

NOTE: The top rear edge of the appliance must locate between the back lip of the wall mounting bracket and the raised supports, see Diagram 12.

- 3.28 Secure through the base of the bracket from underneath with the 2 screws provided, see Diagram 11.

IMPORTANT: If it is required to access the rear explosion relief for servicing the appliance must first be removed from the wall.

Installation Instructions

4. Top or Rear Exit

4.1 Before locating the appliance choose the correct flue outlet position.

4.2 The appliance is supplied as a top exit configuration. To switch outlets remove the cast top plate and decorative flue collar, see Diagram 13.

4.3 The cast top plate lifts off to give access to the inner and outer flue spigots, see Diagram 14.

4.4 Remove the 8 screws securing the inner & outer spigots, see Diagram 15.

4.5 Swap the inner and outer flue spigots **only** with the inner and outer blanking plates on the rear of the appliance, see Diagram 16.

4.6 Attach the decorative flue blanking plate support bracket to the underside of the cast top using the screws provided. Ensure the folded return is pressed against the cast top, see Diagram 17.

4.7 Sit the decorative flue blanking plate in position, see Diagram 18.

Installation Instructions

- 4.8 Replace the cast top. When fitted properly the cast plate should sit flush with the rear of the stove, see Diagram 19.

5. Highline Freestanding Back Panel (Optional)

The Vogue Highline can be supplied with an optional back panel to allow the appliance to be installed in a manner where it can be viewed from 360° without viewing the engine components. Consult your Gazco retailer for details.

To fit the back panel:

- 5.1 Loosen the two screws on the rear of the appliance, see Diagram 20.
Do not remove completely.

- 5.2 Attach the supplied Gas pipe extension to the gas inlet of the appliance.
This will run centrally down the back of the plinth and allow the gas supply to be connected at floor level as required.

- 5.3 Hook the top of the back panel over the extended rear screws, see Diagram 21.

- 5.4 Lower the panel and hook the lower brackets over the edge of the appliance body mid way down, see Diagram 22.

- 5.5 Take care when fitting the back panel not to catch the gas inlet extension pipe. This will protrude from the cutout at the bottom of the panel, see Diagram 23.

Installation Instructions

6. Flue Assembly

6.1 Refer to **Site Requirements** page 15 onward.

6a. Rear EXIT - Horizontal flue

Flue Length

6.2 **Wall Mounted Models:** Measure the total wall thickness and add 25mm.

6.3 **Other Models:** Measure the total wall thickness and add 75mm.
The total flue length gives a minimum clearance of 50mm between the rear of the appliance and the wall.

6.4 Insert the square cardboard sleeve into the flue to support the inner tube.

6.5 Cut through the flue and sleeve, see Diagram 24.

6.6 **REMOVE THE CARDBOARD REMNANTS FROM THE FLUE.**

6.7 File the cut edges smooth.

Wall Mounted Bracket only

6.8 Using the wall mounting bracket as a template, cut a 200mmØ hole on the internal wall only.

6.9 Cut a 150mm hole on the outer wall for the terminal exit.

6.10 The Wall Mounted Kit is supplied with a protective sleeve for the flue. This can be rolled to fit through the hole in the internal wall.

6.11 Feed the sleeve through the hole in the internal wall. This will expand in the cavity to protect the flue from debris etc.

6.12 Fit the flue as detailed, see 6.13.

All Models

Terminal

On the outside wall:

6.13 Position the flue assembly into the hole. The terminal should be flat against the wall.

6.14 Make sure the terminal is vertical, see Diagram 25.

6.15 Mark the four fixing holes.

6.16 Remove the terminal to drill the holes.

6.17 Insert wall plugs supplied.

DO NOT FIX THE FLUE AT THIS STAGE.

Flue and Appliance Fixings

6.18 Position the appliance observing appropriate clearances.

6.19 Apply a bead of suitable weatherproof sealant (silicone or similar) to perimeter of back face of terminal, see Diagram 25.

6.20 Feed the flue through the wall, making sure it runs smoothly.

On the inside wall:

6.21 Engage the flue in the inner and outer spigots.

6.22 Make sure rubber seals on the spigots are not damaged.

From outside:

6.23 Insert four screws in the flanges of the flue terminal.

6.24 Check sealant has formed a water-tight joint to the wall.

6.25 Any terminal less than 2m above any access (level ground, balcony or flat roof with access) must be fitted with the guard supplied, see Diagram 26.

Installation Instructions

6b. Top Exit - Up & Out

ENSURE THE BLACK DECORATIVE TOP AND COLLAR ARE FITTED TO THE TOP OF THE APPLIANCE PRIOR TO INSTALLATION OF A TOP FLUE EXIT. THIS MUST BE POSITIONED BEFORE INSTALLING THE FLUE.

A restrictor may be required with top exit flues. See Technical Specification on page 14 for restrictor sizes.

Wall Plate

- 6.26 A wall plate is supplied to secure the flue to the inside wall. Bend the securing tab to 90° and slot the plate over the flue before bringing the flue through the wall.
- 6.27 Mark the fixing holes using the wall plate as a template. The tab can be above or beneath the flue, see Diagram 28.

Flue Aperture

- 6.28 Mark the height from the top of the hearth to the centre of the horizontal section, see Diagram 27.

- 6.29 **TAKE CARE TO MARK OUT THE FLUE CORRECTLY. IT IS DIFFICULT TO MOVE AFTER INSTALLATION.**
- 6.30 Create a 152mm (6") diameter hole for the flue using either:
a) a core drill, or
b) a hammer and chisel
- 6.31 Make good at both ends of the hole.

Flue Length

- 6.32 The final length of the flue pipe includes the terminal. The terminal is the only section that can be shortened.
- DO NOT SHORTEN ANY OTHER SECTION OF FLUE PIPE.**
- 6.33 Measure from the outside of the wall to the stop on the 90° elbow.

- 6.34 Fit horizontal flue section between the elbow and the terminal at this stage, if required, see Diagram 28.

- 6.35 Mark the correct length all the way around the flue terminal section, see Diagram 29.
- 6.36 Insert the square cardboard sleeve into the flue to support the inner tube.
- 6.37 Cut through the flue and sleeve, see Diagram 29.

- 6.38 **REMOVE THE CARDBOARD REMNANTS FROM THE FLUE.**
- 6.39 File the cut edge smooth.

Flue and Appliance Fixings

- 6.40 Pull appliance and flue assembly away from the hearth.
- 6.41 Drill 4 fixing holes for the wall plate and insert wall plugs supplied.
- 6.42 Put the horizontal flue onto the elbow and reposition the appliance.
- 6.43 Check the flue runs smoothly through the wall.
- 6.44 Fix the wall plate to the wall using the 4 black screws provided.
- 6.45 Drill through the fixing tab of the wall plate using a 3.5mm drill.
- 6.46 Secure with the screw provided.
- 6.47 Make good and weatherproof around the outside of the flue.

Installation Instructions

6c. Top Exit – Vertical Flue

6.48 Where a vertical only flue system has been purchased, refer to Installation & Instructions, Site Requirements, Section 3D.

6.49 Pay careful attention to the following:

Terminal positions
Flue supports
Weatherproofing
Fire precautions

6.50 Local and national codes of practice must be followed for all the above.

6.51 **A restrictor must be fitted with vertical flues. See Technical Specification on page 14 for restrictor sizes.**

PLEASE NOTE: When installing the appliance in conjunction with a vertical termination kit, there is a unique kit for use with this appliance (Gazco Part No. 999-539). This kit differs in that it has restrictors with sliding plates. Please ensure you have the correct kit before proceeding with the installation.

6.52 It is important that the sliding restrictor assembly is used. The restrictor assembly must be fitted with the slide collars uppermost and the top restrictor plate must be checked to ensure it moves freely before the flue is fitted.

7. Gas Soundness Pressure Check

This is essential to expel any debris that may block the gas controls.

7.1 Connect the gas to the 8mm elbow on the rear of the appliance, see Diagram 31 & 32.

Vogue Midi & Midline

Vogue Midi, Midline & Highline T 3 Sided

7.2 Connect a suitable pressure gauge to the test point located on the inlet fitting and turn the gas supply on. Light the appliance and check all gas joints for possible leaks. Turn the appliance to maximum and check that the supply pressure is as stated on the databadge. Turn the gas off and replace the test point screw, turn the gas on and check the test point for leaks.

8. Removing the Glass

8.1 Using a screwdriver remove the 4 screws securing the window panel to the appliance, see Diagram 33 & 34. Take care to support the glass when removing the screws.

Vogue Midi & Midline

Installation Instructions

Vogue Midi, Midline & Highline T 3 Sided

All Models

- 8.2 The frame can be removed by lifting the hooks clear of the slots from the bottom of the frame and lifting away from the appliance, see Diagram 35.

9. Arrangement of the Fuel Bed

Advice on handling and disposal of fire ceramics

The fuel effect of the log version of this appliance is made from Refractory Ceramic Fibre (RCF), a material which is commonly used for this application.

Protective clothing is not required when handling these articles, but we recommend you follow normal hygiene rules of not smoking, eating or drinking in the work area and always wash your hands before eating or drinking.

To ensure that the release of RCF fibres are kept to a minimum, during installation and servicing a HEPA filtered vacuum is recommended to remove any dust accumulated in and around the appliance before and after working on it. When servicing the appliance it is recommended that the replaced items are not broken up, but are sealed within heavy duty polythene bags and labelled as RCF waste.

RCF waste is classed as stable, non-reactive hazardous waste and may be disposed of at a licensed landfill site.

Excessive exposure to these materials may cause temporary irritation to eyes, skin and respiratory tract; wash hands thoroughly after handling the material.

Log Layout

LOGS MUST BE POSITIONED ACCORDING TO THE FOLLOWING INSTRUCTIONS TO GIVE THE CORRECT FLAME EFFECT.

All logs can be identified by a letter (A - D) on their underside. Logs A and B have holes to locate each onto a burner stud.

- 9.1 Ensure the burner tray is clean and free from any debris, see Diagram 36.

Installation Instructions

- 9.2 Place Log A in position on the 2 locating pins, see Diagram 37.

- 9.3 Spread the Lava Rock evenly over the fuel bed and around Log A, see Diagram 38.

- 9.4 Position the 2 embers on the lip at the front of the fuel bed, see Diagram 39.

- 9.5 Log B is positioned on the right hand locating pin, and rests against the back liner, see Diagram 40.

- 9.6 Log C rests on Log A and the front tray with the locating pin facing up, see Diagram 41.

- 9.7 Log D fits onto the locating pin and rests on Log B, see Diagram 42.

- 9.8 Sparingly spread an amount of the Embaglow fibres provided on the sections highlighted, see Diagram 43. Take care not to use more than half a packet per application.

Installation Instructions

10. Completion of Assembly

10.1 To fit the window frame:

Offer the top of the frame to the opening and lower to engage hooks.

10.2 Replace ALL of the glass frame securing screws ensuring that a screw is present in all fixing slots, see Diagram 45 & 46.

Vogue Midi & Midline

Vogue Midi, Midline & Highline T 3 Sided

UNDER NO CIRCUMSTANCES SHOULD THE APPLIANCE BE USED IF ANY OF THE GLASS FRAME RETAINING SCREWS ARE LOOSE OR MISSING.

All Models

10.3 Fit the front by inserting the hooks on the back of the frame into the slots on the front of the appliance, see Diagram 47.

Vogue Midi

10.4 Fit the plinth by inserting the hooks on the back of the frame into the slots on the front of the appliance, see Diagram 48.

Vogue Midi Midline & Highline Models

10.5 Push the lower door closed, see Diagram 49.

Installation Instructions

10. Operating the Appliance

The method used to access the control valve differs between models.

Vogue Midi Models

The control valve is located behind the plinth.

- 10.1 Remove the plinth to access the controls by lifting the hooks clear of the slots on the front of the appliance, see Diagram 50.

Vogue Midline & Highline T 3 Sided

The control valve is located behind the lower door.

- 10.2 Pull the lower door open from the right hand side to access the controls, see Diagram 51.

All Models

The valve has two controls, see Diagram 50:

1. The right-hand knob controls the pilot ignition.
2. The left-hand knob controls the main burner.

- 10.3 Refer to separate instructions if your appliance is upgraded to include battery remote control. The instructions below apply whether or not you have the remote upgrade.

Lighting the Pilot

- 10.4 To start the left-hand and right-hand control knobs must both point to off (●):

- 10.5 Press in the right-hand control knob and rotate anti-clockwise until a click is heard. Continue to press in. The knob points to the pilot (←).

The pilot is lit.

- 10.6 Keep the knob depressed for 10 seconds before releasing. The pilot remains lit.

Repeat the above steps if the pilot does not stay lit.

NOTE: If the pilot goes out, the Interlock system prevents you lighting again for a short period.

- 10.7 If, after repeating the above steps the pilot does not light, contact your Retailer or Installer.

- 10.8 Turn the right-hand knob to the left to main burner setting (↶).

Adjusting the Flame height

- 10.9 You can now adjust the flame height and temperature using the left-hand control knob.

- 10.10 Turn the left-hand knob anti-clockwise to increase the flame height.

- 10.11 Turn clockwise to decrease the height.

IMPORTANT: YELLOW FLAMES TYPICALLY APPEAR WHEN THE APPLIANCE HAS REACHED NORMAL OPERATING TEMPERATURE. THIS CAN TAKE UP TO 30 MINUTES.

WARNING: IF THE APPLIANCE FAILS TO LIGHT OR BECOMES EXTINGUISHED IN USE, WAIT 3 MINUTES BEFORE ATTEMPTING TO RELIGHT.

Commissioning

1. Commissioning the Appliance

- 1.1 Complete the Commissioning Checklist at the front of this manual covering:
 - Flue checks
 - Gas checks
 - Log/fuel effect layout - flame picture
- 1.2 Ensure all safety checks listed in the Commissioning Section are completed, paying particular attention to the glass panel checks and securing of the glass frame.
- 1.3 Upon completion of the commissioning and testing of the installation and correct operation of the appliance, the installer must instruct the user how to operate the appliance.
- 1.4 Guide the user through the User Instructions paying particular attention to:
 - a) Regular servicing (Section 10 of the User Instructions).
 - b) Ventilation (Section 11 of the User Instructions) - point out the ventilation positions where applicable.
 - c) Hot surfaces (Section 13 of the User Instructions).

Servicing Instructions

Servicing/Fault Finding Charts

1. Servicing Requirements

IMPORTANT – The glass panel on this appliance should be checked for any signs of damage on the front face of the glass panel (scratches, scores, cracks or other surface defects). If damage is observed, the glass panel must be replaced and the appliance must not be used until a replacement is installed. Under no circumstances should the appliance be used if any damage is observed. Please isolate the appliance until a replacement glass panel has been obtained and installed. Replacement glass panels can be purchased from Gazco via the retailer from which the appliance was purchased or any other Gazco distributor.

This appliance must be serviced at least once a year by a competent person.

All tests must be carried out in accordance with the current Gas Safe recommendations.

1.1 Before Testing:

- Conduct a gas soundness test for the property ensuring there are no leaks before servicing.
- Check the operation of the appliance before testing.

1.2 Special checks:

- Clean the burner using a vacuum cleaner with a soft brush attachment. Ensure all debris is removed from the burner ports.
- Clean away lint or fluff from the pilot.
- Clean away lint or fluff from under the burner.
- Check the spark gap on the pilot is correct.
- Ensure that the glass frame is secured correctly and that all retaining screws are in place.

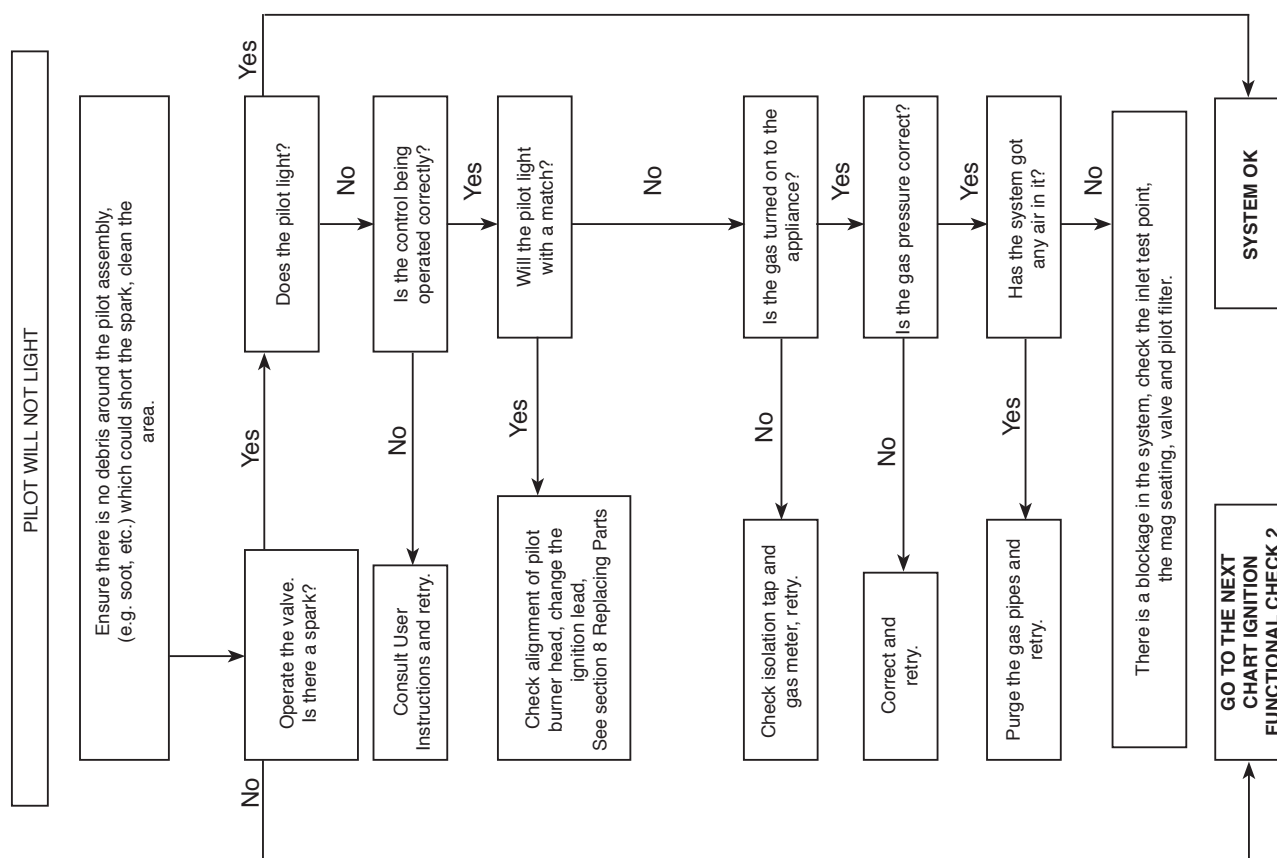

1.3 Correct any faults found during the initial test.

1.4 Re-commission the appliance in accordance with Commissioning Procedures.

1.5 Advise the customer of any remedial work undertaken.

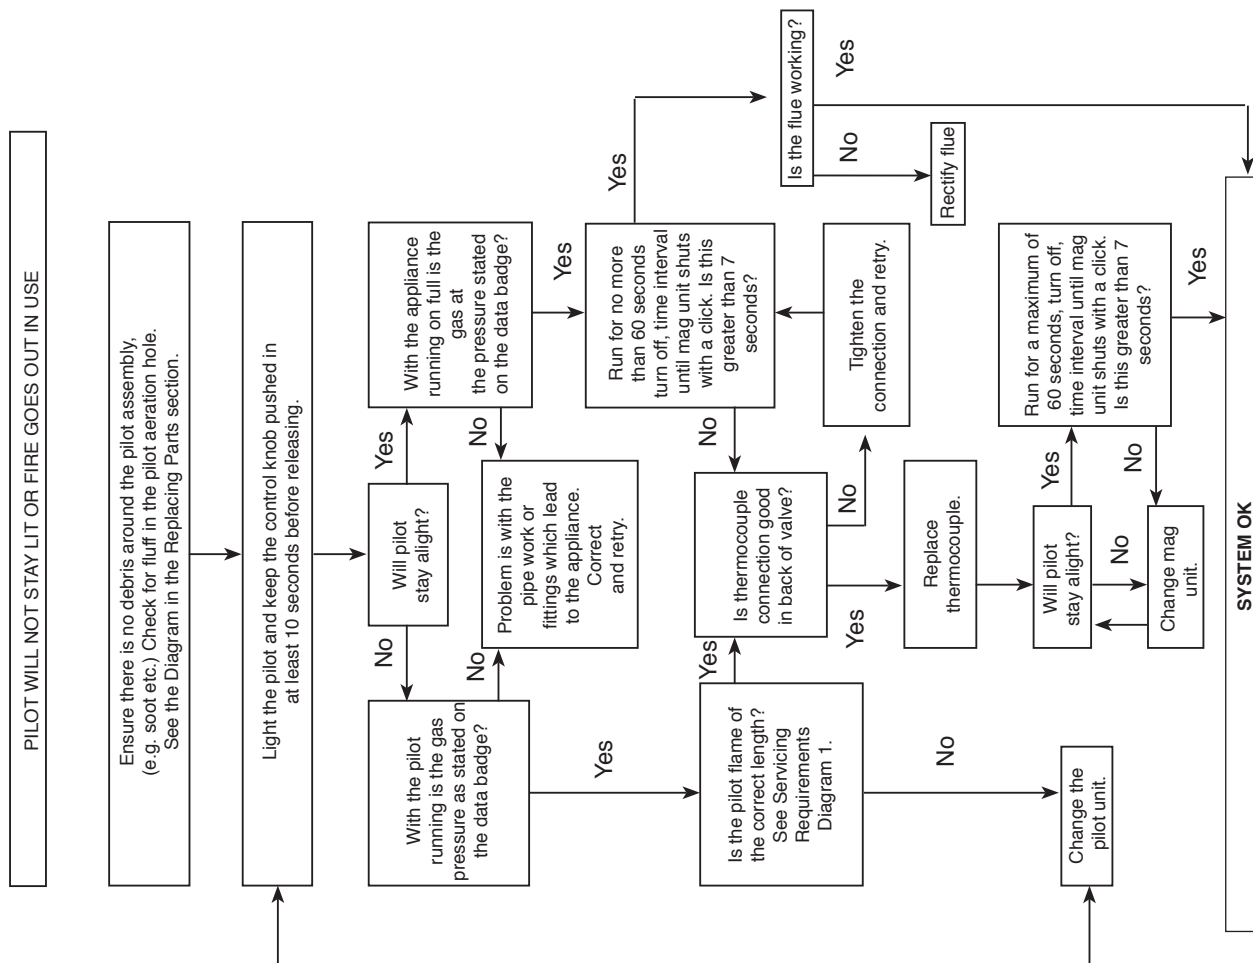

IGNITION FUNCTIONAL CHECK 1

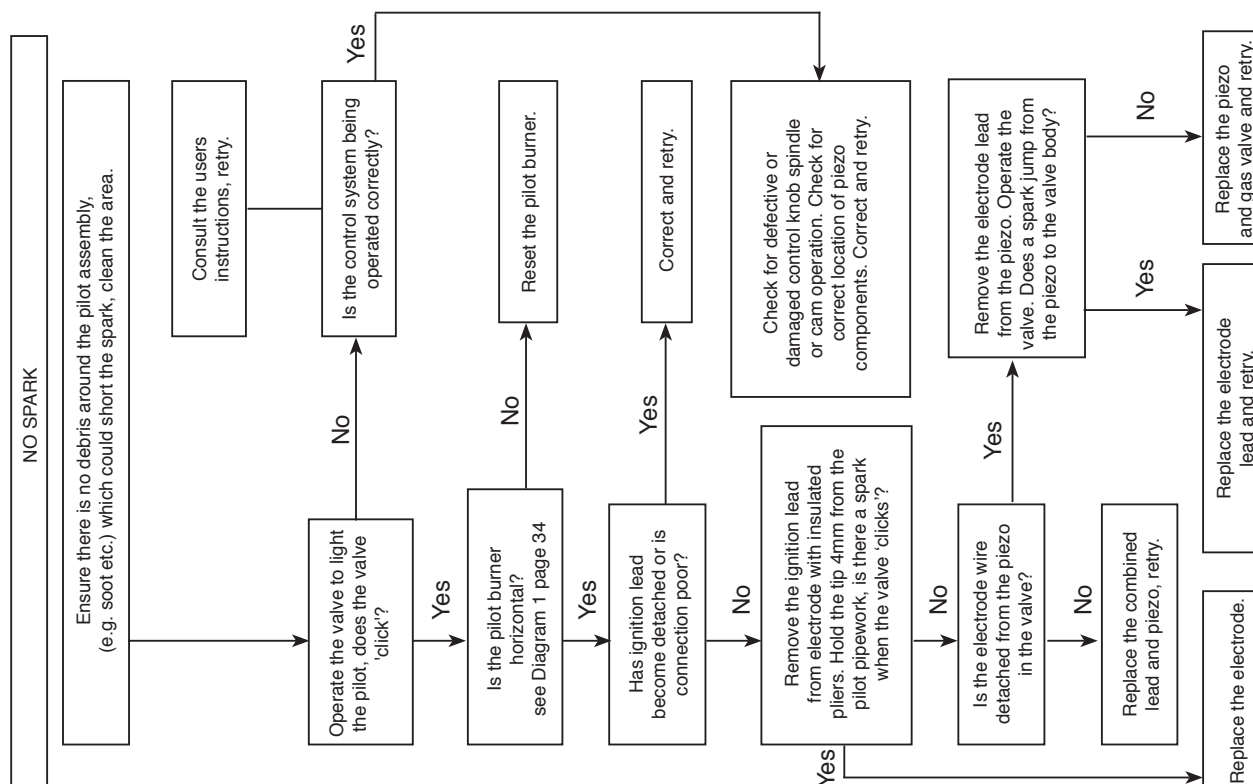

Servicing Instructions

Fault Finding Charts

FLAME FAILURE FUNCTIONAL CHECK 3

IGNITION FUNCTIONAL CHECK 2

Servicing Instructions - Replacing Parts

1. General

- 1.1 All main components can be replaced without removing the appliance from its installation.

IT IS ESSENTIAL THAT THE GAS SUPPLY TO THE APPLIANCE IS TURNED OFF AT THE ISOLATION DEVICE BEFORE PROCEEDING FURTHER.

- 1.2 **Removal of Flue**
If, for any reason, the flue has to be removed from the appliance, the seal must be replaced in the inner spigot.

2. Decorative Front

IMPORTANT: THE OUTER PANELLING OF THE VOGUE IS MADE FROM CAST IRON. USE CAUTION WHEN INSTALLING, REMOVING AND STORING AS THE COMPONENTS ARE HEAVY AND SHOULD BE HANDLED CAREFULLY.

Vogue Midi Models

- 2.1 Remove the plinth to access the controls by lifting the hooks clear of the slots on the front of the appliance, see Diagram 1.

Vogue Midi Midline Models

- 2.2 Pull the lower door open from the right hand side to access the controls, see Diagram 2.

All Models

- 2.3 Remove the frame to gain complete access to the control valve and the viewing aperture by lifting the hooks clear of the slots on the front of the appliance, see Diagram 3.

3. Window Frame Assembly

- 3.1 Using a screwdriver remove the 4 screws securing the window panel to the appliance, see Diagram 4.
Take care to support the glass when removing the screws.

Vogue Midi & Midline

Vogue Mid, Midline & Highline T 3 Sided

- 3.2 The frame can be removed by lifting the hooks clear of the slots from the bottom of the frame and lifting away from the appliance, see Diagram 6.

- 3.3 Place carefully to one side.
- 3.4 The glass frame must be refitted to the appliance following cleaning or servicing. Hold in position and secure with the screws.
- 3.5 Replace ALL of the securing screws ensuring that a screw is present in all fixing slots.

UNDER NO CIRCUMSTANCES SHOULD THE APPLIANCE BE USED IF ANY OF THE GLASS FRAME RETAINING SCREWS ARE LOOSE OR MISSING.

4. Baffle & Liners

To access the burner tray and interior workings of the appliance it may be necessary to remove the baffle and the liners.

4a. Vogue Midi & Midi Midline

BAFFLE

- 4.1 The baffle must be removed before the liners can be taken out of the appliance.

To do this undo the 4 screws securing it to the roof of the firebox, see Diagram 7.

- 4.2 The baffle can now be removed through the front of the appliance.

BLACK GLASS LINERS

Once the baffle has been removed the liners can then be taken out.

- 4.3 To remove the side liners:

Tilt towards the centre of the firebox.

Lift up and pull out of position, see Diagram 8.

Support the rear panel when handling the last side and remove carefully.

- 4.4 Lean the top of the panel forward, lift and twist slightly to allow removal through the front of the appliance.

- 4.5 With the liners and baffle removed the firebox is clear for cleaning and maintenance, see Diagram 10.

- 4.6 To replace the liners and baffle reverse these procedures.

- 4.7 The baffle consists of two parts, the Main Baffle and the Rear Baffle.

To remove the Main baffle, undo the 3 screws, and manoeuvre through the firebox, see Diagram 11.

Note: when replacing the Main baffle ensure that the Main Baffle flap rests on the Rear Baffle, see Diagram 12.

- 4.8 To remove the Rear baffle, undo the 2 screws, see Diagram 13.

Note: When replacing the Rear Baffle ensure that the tab locates behind the rear panel slot, see Diagram 14.

- 4.9 The rear panel is in one piece. Undo the 4 screws and lean forward to remove.

To make removal of the rear panel easier, it may be necessary to remove the burner tray, see Section 5.

- 4.10 To remove the fuel bed trim undo the 2 screws and slide out of the locating slot in the side trims, see Diagram 16, Detail A.

3 Sided Models Only:

- 4.11 To remove the side trim lift and hook off the firebox, see Diagram 17.

i **NOTE:** The Side Trims only need to be removed if damaged or the side glass needs replacing.

5. Main Burner

To replace the main burner:

- 5.1 Remove the 2 securing screws at the front of the burner, see Diagram 18.

- 5.2 Lift the burner out of the firebox at an angle clear the brackets, exposing the service hatch, see Diagram 19.

- 5.3 Refit in reverse order.

Important: Ensure the burner engages with the injector at the base of the firebox, see Diagram 20.

Servicing Instructions - Replacing Parts

6. Control Assembly & Service Hatch

6.1 It is not necessary to remove the complete control assembly to service or replace parts of this appliance. The following sections will detail how to individually remove and replace each element.

6.2 The Vogue has a servicing hatch to allow access to the gas valve and control assembly in the base of the firebox.

Remove the 4 screws holding the service hatch, see Diagram 19.

Remove the panel.

6.3 This will allow access to the rear of the valve, see Diagram 21.

6.4 Reposition the service hatch and tighten the 4 screws, see Diagram 22.

7. Pilot Unit

The pilot assembly consists of 4 components which can be individually changed:

- 7a) Pilot burner bracket.
- 7b) Electrode.
- 7c) Pilot injector.
- 7d) Thermocouple.

NOTE: Ensure the sealant surrounding the Electrode and Thermocouple leads is replaced if disturbed or removed whilst gaining access to these components.

7.1 Turn the gas supply off at the isolation device, remove the door and place to one side, carefully remove the ceramic fuel bed components.

7a. Pilot Burner Bracket

To remove the Pilot Burner Bracket:

- 7.2 **First remove the electrode, pilot pipe and thermocouple as described in the following sections.**
- 7.3 Remove the 2 screws securing the bracket. The pilot burner bracket can now be removed.
- 7.4 Replace in reverse order.

7b. Electrode

- 7.5 Pull the ignition lead off the electrode and undo the retaining nut, see Diagram 23.
- 7.6 Replace with a new electrode. Do not over-tighten the nut; this could break the component.
- 7.7 Replace the ignition lead by pushing the spade connector onto the terminal (electrode).

7c. Pilot Injector

- 7.8 Undo the pilot pipe from the gas valve and from the underside of the pilot burner, see Diagram 23.
- 7.9 Remove the pipe and the injector drops out from the burner.

Servicing Instructions - Replacing Parts

7d. Thermocouple

- 7.10 Disconnect the thermocouple from the gas valve.
- 7.11 Undo the thermocouple nut in the back of the pilot bracket half a turn. This releases the thermocouple.
- 7.12 When replacing with a new thermocouple, take care to bend the new component to the same shape as the thermocouple just removed.
- 7.13 To refit the thermocouple into the pilot bracket, ensure it is pushed fully into the hole. There is a stop on the thermocouple to set the height.
- 7.14 Lock the retaining nut just enough to grip the thermocouple.
- 7.15 Connect the thermocouple to the valve **taking care not to over-tighten**.

8. Ignition Lead

- 8.1 Follow the Pilot Unit instruction to access the back of the pilot assembly.
- 8.2 Disconnect the ignition lead from the electrode.
- 8.3 Remove the front cover from the control valve by removing the retaining screw, see Diagram 24 and gently levering clear with flat bladed screwdriver, see Diagram 25.

NOTE: There is a small cylindrical metal spacer inside the cover, this must be kept and replaced on the fixing screw on re-assembly.

- 8.4 Disconnect the other end of the ignition lead from the valve body noting the route of the ignition lead.
- 8.5 Replace with a new ignition lead following the same route as the old one.

Replace the valve cover and the pilot assembly.
- 8.6 Check operation of the new ignition lead.

9. Piezo

- 9.1 The piezo assembly used on this appliance is not serviceable and is not likely to fail.
- 9.2 If a new piezo is required it will be necessary to change the valve, see Section 10.

10. Gas Valve

- 10.1 To remove the valve turn off the gas supply at the isolation device.
- 10.2 Remove the main burner, see Section 5.
- 10.3 From inside the firebox remove the locknut from the injector, see Section 12.
- 10.4 Remove the pilot feed pipe from the pilot unit, see Section 7.
- 10.5 It is possible to remove the entire control assembly cradle by removing the four wing nuts inside the firebox.
 - First undo the nuts on the injector pipe, thermocouple, and pilot unit.
 - Now undo the 4 wing nuts. The cradle can now be withdrawn.
- 10.6 Alternatively it is possible to just remove the gas valve. Remove the 2 screws at the front of the valve bracket, see Diagrams 26 & 27.

Vogue Midi & Midline

Vogue Midi & Midline T 3 Sided

Servicing Instructions - Replacing Parts

- 10.7 Slide the bracket slightly to the right and pull forward to access the valve connections.
- 10.8 Disconnect the 2 x 8mm and 1 x 4mm gas pipe fittings at the back of the gas valve, see Diagram 28 (A).
- 10.9 Disconnect the thermocouple, see Diagram 28 (B).

- 10.10 Disconnect the ignition lead from the gas valve, see Diagram 28 (C).
- 10.11 Remove the cover, see Section 8.3.
- 10.12 Undo the 2 screws securing the gas valve to the appliance and remove the valve.
- 10.13 Replace in reverse order.
- 10.14 Check all joints for gas leaks and check operation of the thermocouple and ignition lead.

11. Magnetic Safety Valve

- 11.1 Turn the gas supply off at the isolation device.
- 11.2 Remove the gas valve, see Section 10.
- 11.3 Undo the magnetic valve-retaining nut from the back of the control valve, see Diagram 29.
- 11.4 Gently tap out the magnetic valve and replace with a new unit.
- 11.5 Replace the retaining nut and tighten.

- 11.6 Reassemble the interrupter block and leads and secure the thermocouple connection in the rear of the gas control. (Do not overtighten).
- 11.7 Turn the gas supply on and check the entire pipework and valve joints for any leaks.

12. Main Injector

- 12.1 To remove the main injector turn off the gas supply at the isolation device.
- 12.2 Remove the main burner, see Section 5.
- 12.3 Undo the compression nuts from the feed pipe and the gas valve under the appliance.
- 12.4 Working from inside the firebox remove the lock nut from the injector, see Diagram 30.

- 12.5 Extract the injector with the feed pipe from beneath the appliance.
- 12.6 Holding the injector with a spanner:
- 12.7 Undo the feed pipe. **Note the orientation of the Injector.**
- 12.8 Re-assemble in reverse order.
- 12.9 Turn on the gas supply and check for leaks.

13. Glass Side Panels - 3 Sided Models Only

To service the glass side panels, first remove the back panel and the side trims (see Section 4b).

- 13.1 Undo the four screws securing the front bracket and remove, see Diagram 31.

Servicing Instructions - Replacing Parts

- 13.2 Undo the 4 screws securing the rear bracket and remove, see Diagram 32.

- 13.3 Replace the glass and gasket, ensuring that the printed side is facing outwards.

14. Primary Aeration Plate

NOTE: Not all models have aeration plates. Please refer to the Technical Specification.

- 14.1 To replace the primary aeration plate turn off the gas supply at the isolation device.
- 14.2 Remove the burner, see Installation Instructions, Replacing Parts, Section 5.
- 14.3 Undo the 2 nuts and remove the plate.
- 14.4 Replace with the correct size plate and secure the 2 nuts. Ensure that the lower edge of the plate is located over the venturi flange, see Diagram 33.

15. Changing Between Gas Types

A kit of parts is available for this - Contact your Gazco retailer for further information.

It will be necessary to replace the following components:

- Top Baffle
- Burner
- Injector
- Pilot Injector
- Gas Valve

Always quote the Model number and Serial number when ordering any spare parts.

16. Control Upgrade

See Installation Instructions, Section 2.

17. Explosion Relief Gasket

IMPORTANT: If it is required to access the rear explosion relief for servicing the appliance must first be removed from the wall.

- 17.1 It is possible to change the gasket on the explosion relief panel.

Rear Explosion Relief

- 17.2 Remove the 6 screws on each spring panel and the 4 from the centre bracket.

- 17.3 Remove the gasket and replace.

Ensure when replacing that the springs are located into the recess.

- 17.4 Refit in reverse order.

Lower Explosion Relief

- 17.5 Remove the 5 screws on each spring panel, see Diagram 35.

- 17.6 Remove the gasket and replace.

Ensure when replacing that the springs are located into the recess.

- 17.7 Refit in reverse order.

Servicing Instructions - Replacing Parts

Information Requirement - Gas Heaters

Information Requirement for Gaseous Fuel Local Space Heater

Model		Vogue Midi BF NG	Vogue Midi BF LPG	Vogue Midi Midline BF NG	Vogue Midi Midline BF LPG	Vogue Midi T 3 Sided BF NG	Vogue Midi T 3 Sided BF LPG
Fuel	Space Heating Emissions (NOx) - mg / kWh _{input} (GCV)	130	130	130	130	130	130

Heat Output	Nominal Heat Output - P_{nom}	3.9kW	4.0kW	3.9kW	4.0kW	4.8kW	4.3kW
	Minimum Heat Output (indicative) - P_{min}	1.8kW	1.8kW	1.8kW	1.8kW	2.9kW	2.4kW

Auxiliary Electricity Consumption	At Nominal Heat Output - $e_{l,max}$	N/A	N/A	N/A	N/A	N/A	N/A
	At Minimum Heat Output - $e_{l,min}$	N/A	N/A	N/A	N/A	N/A	N/A
	In Standby Mode - $e_{l,sb}$	N/A	N/A	N/A	N/A	N/A	N/A

Useful Efficiency	Useful Efficiency at nominal heat output - $\eta_{th,nom}$	90.6%	90.6%	90.6%	90.6%	94.3%	94.3%
	Useful Efficiency at minimum heat output (indicative) - $\eta_{th,min}$	80.2%	80.2%	80.2%	80.2%	91.5%	91.5%

Pilot Flame Power requirement	Permanent Pilot Flame Power requirement (if applicable) - P_{pilot}	0.200kW	0.200kW	0.200kW	0.200kW	0.200kW	0.200kW
-------------------------------	---	---------	---------	---------	---------	---------	---------

Type of heat output/room temperature control							
Electronic room temperature control + day timer		Yes	Yes	Yes	Yes	Yes	Yes

Other control options (multiple selections possible)							
Room temperature control, with presence detection		No	No	No	No	No	No
Room temperature control, with open window detection		No	No	No	No	No	No
With distance control option		No	No	No	No	No	No
With adaptive start control		No	No	No	No	No	No
With working time limitation		No	No	No	No	No	No
With black bulb sensor		No	No	No	No	No	No

Energy Efficiency Index	84.0%	84.1%	84.0%	84.1%	88.2%	88.0%
Energy Efficiency Class	B*	B*	B*	B*	A*	A*

*When used with optional Thermostatic Control
